COMIREX-M-39

25X1A

5. [] supplied the following report of attempts to satisfy two outstanding requirements in the South China/North Vietnam area.

a. Coverage of Lines of Communications (LOC) pertinent to the introduction of Chinese forces into North Vietnam (See COMOR-D-25/207, 4 March 1966). The number of LOC priority targets in South China and North Vietnam remains at 144. For the period 23 - 29 May 1968, surveillance coverage was reported on 13 priority targets in North Vietnam. The specific targets are underlined in Tab A.

b. Coverage of North Vietnam to detect the possible introduction or deployment of offensive missile systems (See COMOR-D-25/220, 23 May 1967 and COMIREX-D-25.3/2, 20 November 1967). The area coverage reported obtained between 9 - 29 May 1968 consisted of five GIANT SCALE and seven BUMPY ACTION missions. The coverage is shown on the grid map at Tab B. No SSM activity was observed.

Report on Aircraft Activity--Cuba

25X1

6. [] advised that no GLASS LAMP missions had been flown in the period 24 - 29 May.

7. [] reported that for the 56-day period beginning 4 April 1968, four GLASS LAMP missions were flown over Cuba and provided 90 percent coverage of the area. During this period 134 of the 140 targets in Cuba were covered completely on cloud-free photography.

Section II (NPIC Report)

Mission Highlights

25X1

25X1A

1. [redacted] showed four boards as follows:

25X1D

c. A probable Squat Eye radar was photographed in North Vietnam by BUMPY ACTION 18 April. The Squat Eye, the first in North Vietnam, is now identified one n.m. south of Phuc Yen. Deployment of these radars began in the Warsaw Pact countries in 1967. This radar supposedly has an improved capability, over Flat Face, against low altitude targets.

d. Yen Bai, North Vietnam. Photography shows completion of the runway and taxi-way, following 2 1/2 years of construction. The runway is 7500 feet by 180 feet. Although considerable construction activity continues, the airfield is serviceable and is probably operational.

Domestic Targets

6. A recommended list of domestic targets received from NPIC to support project "Brainstorm" was approved for inclusion [redacted] [redacted] [redacted] These targets will be used to determine the quality of the mission in terms of mensuration by utilizing the ground truth data from project "Brainstorm". Approval was contingent on a "no cost" basis to intelligence collection.

SEARCH

7. Through Mission 1103 the satisfaction of the search requirement is as follows:

- a. Built-up areas - 67% Complete
- b. Underdeveloped areas - 66.7% Complete

Report on Far East Coverage

8. Attached at Tab C is the periodic report on the status of collection against the Far East requirement.

Cuba

9. As a result of a review of the Cuban target file, the ICRS members approved the inactivation of 45 targets. The file contains a new total of 140 targets.

Report from Imagery Exploitation Subcommittee [redacted]

25X1

10. [redacted] reported that EXSUBCOM is working actively on revision of the film distribution problem for KH-4 [redacted] [redacted] explained that the objective is to cut down on unnecessary distribution. EXSUBCOM also plans to begin studying the problem [redacted] distribution.

Report from Data Base Working Group

11. [] advised that he has established a task team on target delineation. This team will be under the chairmanship of NPIC, and NRO will participate. As of the time of this report, no problems are anticipated.

Report from Exploitation Research and Development Subcommittee

12. [] advised that there has been further discussion of how to arrive at objective priorities for the EXRAND objectives. [] warned the Chairman that, even with the inclusion of substantive participants, the arbitration of priorities seems to present problems.

Section V (Status of Recent COMIREX Papers)

Recommendations Affecting the NRP Five-Year Plan

25X1A

1. [redacted] referred to the phraseology in the paper and wished to make it a matter of record that the guidance requested was with regard to the five-year budget cycle.

[redacted] also felt it would be helpful to be specific that satellite reconnaissance is the subject.

25X1D

3. The DIA member had some suggestions to improve paragraph 6 particularly aimed at conveying a better image of the present search program. [redacted] suggested that his language was to some extent prompted by his unhappiness with the search

Control Systems Jointly

COMIREX-M-39

25X1A

requirement as presently stated. He agreed to some changes to the paragraph based on the expectation that COMIREX will soon come up with a definitive new requirement to guide the search efforts. Pertinent to this the Chairman emphasized that an essential ingredient in satellite reconnaissance is a proper balance and interplay between systems. While noting that the EEI exercise is important in specifying what resolution is needed for Phase III reports, the EEIs are not fundamental to a proper conduct of search and surveillance types of reconnaissance. In broad terms the search program is served by a resolution which is adequate to detect activity in places where previously there was no activity. The surveillance program, aided where appropriate by the so called search vehicle, is founded on a program with a periodicity designed to detect significant change to known targets.

4. In conclusion the Chairman noted that the draft paper with some changes presented by the Acting CIA member and additional suggestions made at the meeting appeared to be acceptable to COMIREX. The principal exception was that of [] to paragraph 9. [] suggested that this could be discussed further and a footnote could be added if necessary. /The revised paper was forwarded to USIB as COMIREX-D-11.1/1./
